

Environmental Statement

Flatiron is committed to managing resources and developing infrastructure in an environmentally-responsible and cost-effective manner consistent with our core values and guiding principles.

Effective environmental management is critical in infrastructure. We strive to minimize environmental impacts through consistent, feasible improvements that proactively address environmental management and performance.

As part of our commitment, we deliver work that aligns with the following cornerstones of environmental management:

PERMIT AND REGULATORY COMPLIANCE

We comply with all applicable federal, state and local laws, regulations and specifications on our projects.

SUSTAINABILITY

We implement best practices based on our commitments to reduce emissions, improve energy and water efficiency and foster a circular economy.

REUSE, RECYCLE AND WASTE REDUCTION

We commit to our operations and business units reusing and recycling all types of materials. Our goal is to send no non-hazardous waste to landfills.

CLIMATE CHANGE

We commit to consistent reduction of carbon emission rates with the long-term goal of achieving carbon neutrality, Net Zero. Using periodic audits, assessments and evaluations, we review and implement policies so that our operations and business practices effectively reduce emissions.

BIODIVERSITY AND NATURAL RESOURCES

We pledge to work collaboratively with our client partners to reduce or eliminate direct and indirect biodiversity and natural resource impacts. Through evaluation, mitigation, restoration and efficient use of natural resources, we minimize our operations' environmental impacts.

PREVENTION OF POLLUTION AND ACCIDENTAL SPILLS

We prevent or mitigate adverse environmental impacts from pollution and/or accidental spills. We periodically review and revise our process and procedures for refinement and continuous improvement.

EDUCATION, TRAINING AND PROFESSIONAL CERTIFICATIONS

We educate all employees on the sustainability plan and our commitments to ensure organization-wide alignment with expectations, best practices and our commitments. We will provide necessary training to all employees for the implementation and installation of environmental best management practices (BMP). We also will foster our employees' ability to obtain professional environmental certifications.

GOVERNMENT AFFAIRS

We commit to partnering with clients, government agencies, resource agencies and communities by actively participating in committees, work groups and panels that serve the communities where we live and work for the betterment of the environment.
